

I am an American Truck Driver. The Nature of my business demands that I have reliable sources for traffic weather and news in ALL areas of the country. The stations and companies that the NAB represents can not, and do not meet those criteria! I have chosen XM satellite radio because they do meet those criteria, and should they be prevented from providing that programing I will not only be disapointed in you that FCC, I will also seek out others to vote with me to correct a potential failure on your part. Do not, in any way prohibit or prevent XM radio from broadcasting any programing that they see fitting, ever.
